**Job description:** The EHS Manager & two EHS Officers will be part of the core safety management team at the institute which will be headed by the Institute's Safety committee. Primary responsibilities include the following:

- (a) Develop and document Chemical, Fire, Electrical, Radiological safety and other general EHS protocols at the institute.
- (b) Organize periodic training and enabling stakeholders to understand the principles and applications of general EHS issues.
- (c) Carry out EHS inspections along with respective lab Director to assess conformity of various laboratories within the institute.
- (d) Suggest corrective actions if any after the inspection, follow-up and help the laboratories in implementing the suggested corrective actions.

- (e) Assist in the development of a centralized safety portal (website) for the entire institute which would serve as a repository for safety education, training and documentation.
- (f) Develop guidelines for emergency preparedness and streamline emergency response with regards to Fire, Chemical, Electrical, and Health related accidents/emergencies.
- (g) Develop EHS guidelines and educate stakeholders with respect to radiation and laser safety.
- (h) Assist in the development of a centralized chemical inventory database with storage and usage information.
- (i) Assist Lab Directors to maintain material safety data sheets for all stored chemicals.
- (j) Develop chemical-class labels and ensure chemical segregation according to chemical compatibility/class.
- (k) Verify chemical labelling and compatibility of chemicals stored at labs and central stores. Ensure incompatible chemicals are stored separately.
- (l) Help lab Directors maintain and manage gas cylinder stock, distribution, storage and use.
- (m) Organize regular EHS training meetings/workshops to educate stakeholder on chemical hygiene and hazard programs
- (n) Develop guidelines and procedures for disposal of chemical waste and waste treatment
- (o) Develop and document biological safety protocols at the institute.
- (p) Other responsibilities assigned by the safety committee.

**In addition to the above, the responsibilities of the EHS Manager will include the following:**

- (q) Ensure implementation of general EHS in the institute which includes safety measures during construction/building repair/demolition work/laying high tension electrical cables/laying water lines. Ensure that the work is being carried out as per the protocols/procedures and the regulations recommended/set by concerned governmental authorities.
- (r) Provide periodic presentations and submit reports with statistics about the status of safety infrastructure, safety practices and their effectiveness at the institute to the Institute's safety committee.
- (s) Liaison with concerned authorities for ensuring complete compliance with governmental regulations with regards to safety in the workplace and protection of the environment through prevention of environmental pollution.

Eligible candidates may email their CV for the said position to [safety.olsek@iisc.ac.in](mailto:safety.olsek@iisc.ac.in) (Mention in the subject line "**Application for the post of EHS Manager /EHS**")

**Officer”)** on or before 01.03.2019. The CV must contain at a minimum the details of education, past work experience relevant to this position, date of birth and address for communication. The candidates may also include a short discretion of their plans for implementing safety at the institute.

The appointment shall initially be for a period of 2 years (first year is probationary), extendable depending on the progress of the work. It may be noted that the appointment is purely temporary, and the candidate shall not carry any right to seek regular employment after completion of the term.

The hard copy of the application signed and dated by the applicant along with recent passport size photograph and photocopies of relevant certificates and other testimonials in support of age, qualification and experience should be submitted at the time of interview.
